State, local, and international government agencies or institutions that award funding to WU are sometimes referred to collectively as “Other Government”. This category can include funding not only from governments but also from state institutions, such as public universities, in the form of subawards.

Note: ARRA was enacted in February 2009; therefore, no ARRA funding was received in FY08. A negligible amount of ARRA flow-through funding was received from non-Federal sources in FY12, FY13, and FY14.
